without waste

Glasstone is made from SMC（Sheet Molding Compound）, a composite material combined with resin, fibreglass and filler, compressed with metal mould at 190 ° C. Glasstone has a solid surface and high gloss finish.

Glasstone has been used to make airplane train and car component. It also has been used to make bath tubs, shower trays basins laundry tubs and sinks in USA, Euro, and Japan. AS pressed from metal mould, it has precise measurement on the sizes.

Glasstone has low profile design and light weight. It is stronger than ceramic polymarble and Acrylic. It is also economic and easy to clean.

**SMC SHOWER TRAY**

- . Sheet molding compound
- . ABS white waste
- . Low profile
- . Self-supporting
